

Archit Kiran Kumar

Boston, Massachusetts, United States | architkiran@gmail.com | (857) 961-6066 | [linkedin.com/in/architkiran](https://www.linkedin.com/in/architkiran)

Professional Summary

Data Analyst with hands-on experience in SQL, Python, and Power BI, skilled at validating data quality, performing statistical and predictive analysis, and building dashboards and metrics that support performance monitoring and data-driven decision-making. Experienced integrating data from multiple sources to uncover trends, correlations, and actionable insights for stakeholders. MS in Computer Science candidate at Boston University, bringing strong technical grounding, clear documentation, and cross-functional communication to a Data Analyst role.

Education

Boston University

Master of Science, Computer Science

Sep 2025 - Dec 2026

Ramaiah Institute of Technology

Bachelor of Engineering, Computer Science and Engineering

Dec 2021 - Jun 2025

Skills

Analytics & Statistics: SQL, Python (Pandas, NumPy), R, Excel, Statistical Analysis, A/B Testing, Hypothesis Testing, EDA, Predictive Analytics, Forecasting

BI & Visualization: Power BI, Tableau, DAX, Looker, Plotly, Dashboard Development, Reporting Automation

Databases & Cloud: PostgreSQL, MySQL, BigQuery, Snowflake, Redshift, Databricks, AWS, GCP

Tools: Git, Jira, REST APIs, Data Validation, Data Reconciliation, Technical Documentation, Data Storytelling

Work Experience

Data Analyst

BU Spark – Boston, MA

Jan 2026 – May 2026

- Conducted root-cause error analysis across a 200-query validation dataset to identify intent misclassifications, redesigning semantic detection logic to optimize chatbot query routing.
- Engineered an automated Pandas data transformation workflow to validate accuracy in 5,000+ support tickets, reducing input noise by 30% and cutting downstream compute costs by 40%.
- Modeled resolution bottlenecks across ~5,000 records in SQL/Pandas and built interactive Power BI dashboards and performance metrics, partnering with stakeholders to communicate insights and drive resource allocation.

Data Analyst Intern

Millicent Technologies – Bangalore, India

Jan 2025 – Jul 2025

- Reduced reporting turnaround time by 30%, enabling same-day data availability across 3 business units, by diagnosing recurring delays in 100K+ daily records and redesigning the workflow with engineering and operations leads.
- Became the team's default reporting tool by building 8 Tableau and Excel dashboards adopted across 1,200+ users, consolidating scattered KPI requests into a single source of truth for data quality and engagement tracking.
- Eliminated reporting inconsistencies across 3 business units by leading requirements-gathering sessions with 5 cross-functional stakeholders to align conflicting KPI definitions into a single governance standard.

Projects

Payments & Interchange Economics – Margin Leakage Investigation

Identified \$141K in annual margin leakage across a \$130M payments portfolio by statistically modeling interchange spreads across 220 merchants, card networks, and MCC tiers in PostgreSQL, and proposed a segment-level repricing strategy visualized in a 3-page Power BI dashboard.

Position Break Intelligence System

Surfaced \$8.1M in unreconciled exposure by validating and analyzing PMS and Custodian feeds, classifying 1,560 position-days by severity, and delivering findings through a 3-page Power BI dashboard.

Corporate Financial Intelligence Dashboard

Automated data collection from 30+ public companies by integrating multiple Python API sources, computed 10+ KPIs (P/E, ROE, margins), and built interactive Plotly visualizations for executive-level trend analysis.

Leadership & Activities

- Best Project Award** – National-level data-driven cybersecurity research on EV Charging Networks.
- Data Club Lead** – Led weekly SQL/Python workshops mentoring 40+ students on data visualization and analytics.
- Hackathon Lead** – Delivered an end-to-end analytics solution within a 24-hour sprint, presenting to industry judges.
- AICTE Volunteer** – Facilitated data literacy workshops and one-on-one mentoring for 500+ learners across AICTE-affiliated institutions, helping students build foundational SQL and Excel skills for entry-level analytics roles.
