PROFESSIONAL SUMMARY

Data Analyst with hands-on experience building automated Python data pipelines, writing complex SQL queries, and designing Power BI dashboards that drive operational efficiency. Proven track record of reducing reporting turnaround times, validating thousands of operational records, and partnering with cross-functional stakeholders to translate complex data into actionable business insights. Master of Science in Computer Science candidate at Boston University bringing strong technical execution and data governance expertise to US analytical roles.

WORK EXPERIENCE

Data Analyst Jan 2026 – May 2026
BU Spark *Boston, MA*

- Diagnosed intent misclassifications through root-cause error analysis across a 200-query validation dataset, redesigning semantic detection logic to optimize chatbot query routing accuracy.
- Built an automated Pandas workflow to validate 5,000+ support tickets, reducing invalid category tags from 42% to under 12% and cutting downstream compute costs by 40%.
- Analyzed resolution bottlenecks across ∼5,000 tickets in SQL and Pandas, finding that misrouted tier-1 triage steps drove 65% of resolution delays, and built Power BI dashboards that helped stakeholders prioritize automated agent routing rules.

Data Analyst Intern Jan 2025 – Jul 2025
Millicent Technologies *Bangalore, India*

- Cut reporting turnaround by 30% and enabled same-day data availability across 3 business units by diagnosing recurring pipeline ingestion delays in 100K+ daily records and redesigning the workflow with engineering and operations leads.
- Built 8 Tableau and Excel dashboards adopted by 1,200+ users, consolidating scattered KPI requests into a single source of truth for data quality and engagement tracking.
- Aligned conflicting KPI definitions across 3 business units by leading requirements sessions with 5 cross-functional stakeholders, creating one governance standard.

PROJECTS

- **Payments & Interchange Economics - Margin Leakage Investigation:** Identified $141K in annual margin leakage across a $130M payments portfolio by running variance analysis on interchange spreads for 220 merchants, card networks, and MCC tiers in PostgreSQL, and proposed a segment-level repricing strategy in a 3-page Power BI dashboard.
- **Position Break Intelligence System:** Surfaced $8.1M in unreconciled exposure by validating PMS and custodian feeds and classifying 1,560 position-days by severity, delivering a 3-page Power BI dashboard that flagged unallocated corporate action adjustments as the top break type for immediate audit.
- **KPI Trust Dashboard - Metric Reconciliation:** Reconciled Finance (payments-based) and Growth (item-plus-freight) revenue across 614 days and R$15.7M of Olist orders in DuckDB SQL, showing the 44% of days that disagreed totaled only R$5.8K (0.04%), then defined a canonical metric and built a Streamlit drilldown dashboard.

EDUCATION

Boston University, Boston, MA Sep 2025 – Dec 2026
Master of Science, Computer Science

Ramaiah Institute of Technology, Bangalore, India Dec 2021 – Jun 2025
Bachelor of Engineering, Computer Science and Engineering

SKILLS

- **Analytics & Statistics:** SQL, Python (Pandas, NumPy), R, Excel, Statistical Analysis, A/B Testing, Hypothesis Testing, EDA, Predictive Analytics, Forecasting
- **BI & Visualization:** Power BI, Tableau, DAX, Looker, Plotly, Dashboard Development, Reporting Automation
- **Databases & Cloud:** PostgreSQL, MySQL, BigQuery, Snowflake, Redshift, Databricks, AWS, GCP
- **Tools:** Git, Jira, REST APIs, Data Validation, Data Reconciliation, Technical Documentation, Data Storytelling

LEADERSHIP & ACTIVITIES

- **Best Project Award:** National-level data-driven cybersecurity research on Electric Vehicle (EV) Charging Networks.
- **Data Club Lead:** Directed weekly SQL/Python workshops mentoring 40+ students on data visualization and analytics.
- **Hackathon Lead:** Delivered an end-to-end analytics solution within a 24-hour sprint, presenting to industry judges.
- **AICTE Volunteer:** Facilitated data literacy workshops and one-on-one mentoring for 500+ learners across AICTE-affiliated institutions, building foundational SQL and Excel skills.
