PROFILE

Data Analyst and Data Engineer with hands-on experience building ETL pipelines, reconciliation systems, financial dashboards, and analytics solutions across fintech and operational domains. MS in Computer Science at Boston University with a track record of automating reporting, standardizing KPI frameworks, and delivering data-driven insights for cross-functional teams.

EDUCATION

Master of Science in Computer Science Boston University, Boston, MA	Dec 2026
Bachelor of Engineering in Computer Science and Engineering Ramaiah Institute of Technology, Bangalore, India	Jun 2025

SKILLS

Data Analytics: SQL, Python (Pandas, NumPy), R, Excel, Statistical Analysis, A/B Testing, Hypothesis Testing, EDA
Data Engineering: ETL/ELT Pipelines, Data Validation, Data Quality, Data Modeling, Data Warehousing
Databases & Cloud: PostgreSQL, MySQL, DuckDB, BigQuery, Snowflake, Redshift, Apache Spark, PySpark, AWS, GCP
Visualization & BI: Tableau, Power BI, DAX, Plotly, Streamlit, Dashboard Development, Reporting Automation
Tools & Methods: Git, Jira, Agile, dbt, REST APIs, Data Reconciliation, Cross-functional Collaboration

EXPERIENCE

Data & Front-End Intern Millicent Technologies	Bangalore, India Mar 2025 – Jul 2025
--	---

- **ETL Pipeline Automation:** Built automated pipelines processing 100K+ records daily using SQL and Python, reducing reporting delays by 30% and enabling same-day data availability for 3 business units.
- **KPI Dashboard Design:** Designed 8 Tableau/Excel dashboards tracking data quality, customer engagement, and operational KPIs for 1,200+ users, adopted as the primary reporting tool by product and operations teams.
- **Data Governance & Standardization:** Led requirements gathering with 5 cross-functional stakeholders to standardize 20+ KPI definitions and implement data warehouse governance rules, eliminating reporting inconsistencies across 3 business units.

Data Analyst Intern InternPe	Bangalore, India Apr 2024 – Sep 2024
--	---

- **Data Extraction & EDA:** Engineered a SQL/Python extraction layer processing 200K+ records, applying statistical analysis and anomaly detection to improve data accuracy by 25%.
- **Reporting & BI Dashboards:** Built 10+ Power BI reports and Excel dashboards for ad-hoc and scheduled reporting on revenue, churn, and operational KPIs, presented to senior stakeholders and adopted as the primary decision-making tool.
- **Data Quality & Schema Alignment:** Executed data cleaning, schema alignment, and validation rules across 8 database tables, improving dataset integrity and reporting consistency by 40%.

PROJECTS

- **Position Break Intelligence System** Mar 2026 – Apr 2026
Surfaced \$8.1M in unreconciled exposure by building a reconciliation pipeline across PMS and Custodian feeds, classifying 1,560 position-days by severity and delivering findings through a 3-page Power BI dashboard.
- **Manufacturing Quality Analytics Dashboard** Mar 2026 – Apr 2026
Cleaned a 100K-row manufacturing dataset through an 8-step Python pipeline; identified a 9.7pp machine defect spread and built a 3-page Power BI dashboard with DAX measures tracking OEE, scrap cost, and maintenance signals.
- **Corporate Financial Intelligence Dashboard** Jan 2026 – Feb 2026
Automated financial data ingestion for 30+ public companies via Python APIs, computed 10+ KPIs (P/E, ROE, margins), and built interactive Plotly visualizations for executive-level trend analysis.
- **Live Traffic Data Analytics (PySpark)** Aug 2024 – Sep 2024
Engineered distributed PySpark and SQL pipelines processing 2M+ real-time traffic records, performing EDA and anomaly detection to uncover congestion patterns and improve route efficiency by 18%.

LEADERSHIP & ACTIVITIES

- **Best Project Award** – National-level data-driven cybersecurity research on EV Charging Networks.
- **Data Club Lead** – Led weekly SQL/Python workshops mentoring 40+ students on data visualization and analytics fundamentals.
- **Hackathon Lead** – Delivered an end-to-end analytics solution within a 24-hour sprint; AICTE Volunteer supporting 500+ learners.
